Online Exhibition @ Virtual Art Gallery  
Launch - 1st July 2025, 6pm

## **Series 2 - Places and Spaces**

In this digital collage series, Melynda von Wayward explores the concept of places and spaces and how familiar environments, such as the suburbs that we live in, shopfronts, tourist attractions, cityscapes, outdoor areas, and even shadows, can evoke a different meaning from the ones that we be might familiar with.

Melynda intersperses photography that has been taken by herself and others, to create digital collage pieces that explore themes such as religion, power, money, politics, beauty and the environment.
